

JEFF DENTON // FRONT-END WEB DEVELOPER

education

Front-End + Ruby on Rails course at General Assembly, January - May 2013

BFA in Photography from Columbus Collage of Art and Design, 2001

employment

Deutsch Inc

Developer // February 2015 - Current

I work with a diverse team of developers on all aspects of creating a website from prototyping to deploying code ready to run in all browsers. Using a wide range of technologies such as Node.js, React, Flux, Backbone, WebGL, Express, and MongoDB. Integrating with CMS and CRM systems. Working with a team of UX and digital designers.

Access Intelligence

Contract Front-End Web Developer // August 2014 - February 2015

I worked with a small team focused on creating multimedia articles that utilize animation and parallax effects tied to scrolling. I rebuilt a small framework for parallax projects (built on top of Skrollr and Bootstrap and created a template for future projects. Lead development on a series of sites built with Angular for various industry award programs.

Aarting

Javascript Developer // June 2014 - November 2014

Working closely with the product co-founders on the front-end of a Ruby on Rails application, I added JavaScript functionality to enhance user experience.

Luxurious Animals

Junior Technologist // July 2013 - May 2014

While working on a small team of front-end developers, I learned to architect, code, test, and deploy applications while collaborating with designers and producers to shape the functionality and user experience of desktop and mobile web applications. I also learned how to employ best practices, and how to research and test new technology.

technical skills

Developing cross-browser web sites and applications.

Precise translation of design into HTML and CSS.

Responsive web design with CSS media-queries.

Proficient with Git for version control.

Technologies used: HTML, CSS, and JavaScript. Sass and PostCss. Node.js, Grunt, Gulp, Bower, Browserify, Webpack, Babel, Express.js, MongoDB, React, Flux, jQuery, Backbone.js, AngularJS, RequireJS, Facebook Open Graph, Instagram and Twitter APIs, Bootstrap, Greensock Animation Platform, Velocity.js, NPM and other open source frameworks, plugins, and libraries necessary to get the job done.

some interests

Clean readable code. Aligning equal signs and colons. Full-stack JavaScript development. Universal Javascript with React. Static site generators. Learning new frameworks. Comic books. Web experiments. Plaid shirts.
