JEFF DENTON // FRONT-END WEB DEVELOPER

employment

Deutsch Inc
Developer // February 2015 - Current

I work on a diverse team of developers, UX and digital designers and producers to build interactive experiences. Using a wide range of technologies such as Node.js, React, Flux, Backbone, WebGL, Express, and MongoDB to prototype ideas and deploy code ready to run in all browsers. Integrating with CMS systems. In addition to client work I'm responsible for researching and testing new technologies.

Access Intelligence
Contract Front-End Web Developer // August 2014 - February 2015

I worked with a small team to create multimedia articles that utilize animation and parallax effects tied to scrolling. I rebuilt their framework for parallax projects (built on top of Skrollr and Bootstrap) and created a template for future projects. Lead development on a series of sites built with Angular for various industry award programs.

Aarting
Javascript Developer // June 2014 - November 2014

Working closely with the product co-founders on the front-end of a Ruby on Rails application, I added JavaScript functionality to enhance user experience and add product features.

Luxurious Animals
Junior Technologist // July 2013 - May 2014

While working on a team of front-end developers, I helped to architect, code, test, and deploy applications while collaborating with designers and producers to shape the functionality and user experience of desktop and mobile web applications. The team was rigorous about employing best practices and exploring and testing new technologies.

technical skills

Developing cross-browser web sites and applications.

Precise translation of design into HTML and CSS.

Responsive web design with CSS media-queries.

Proficient with Git for version control.

Technologies used: HTML, CSS, and JavaScript. Sass and Compass. Node.js, Yeoman, Grunt, Gulp, Bower, Express.js, MongoDB, React, Flux, jQuery, Backbone.js, AngularJS, RequireJS, Facebook Open Graph, Instagram and Twitter APIs, Bootstrap, Greensock Animation Platform, Velocity.js, NPM and other open source frameworks, plugins, and libraries necessary to get the job done.

education

Front-End + Ruby on Rails course at General Assembly, January - May 2013

BFA in Photography from Columbus Collage of Art and Design, 2001

some interests

Clean readable code. Full-stack JavaScript development. Learning new frameworks. Comic books. Web experiments. Raspberry Pi and Arduinos. Plaid (the pattern).
